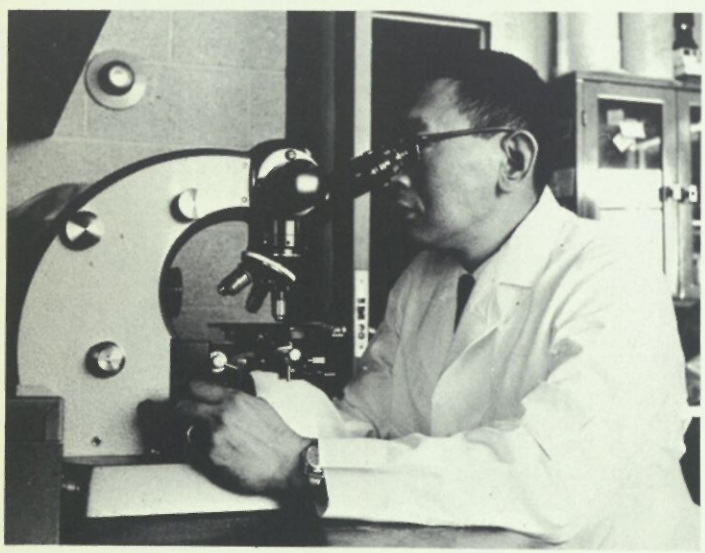
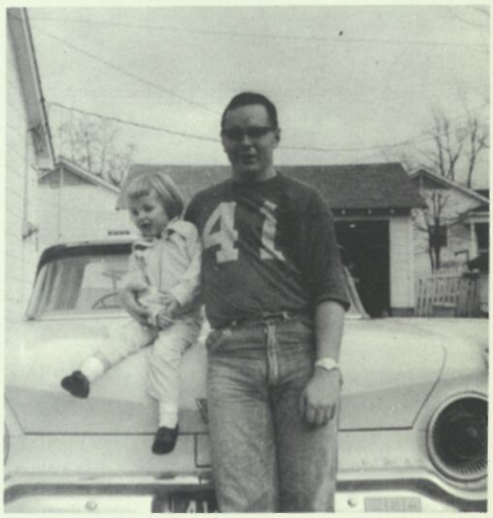
DR. HOWARD K. SUZUKI

DEDICATION

. . . to our
good friend
who has played such
an important part in
each of our lives . . .



IN MEMORIAM



EDWARD K. HYATT, M.D.

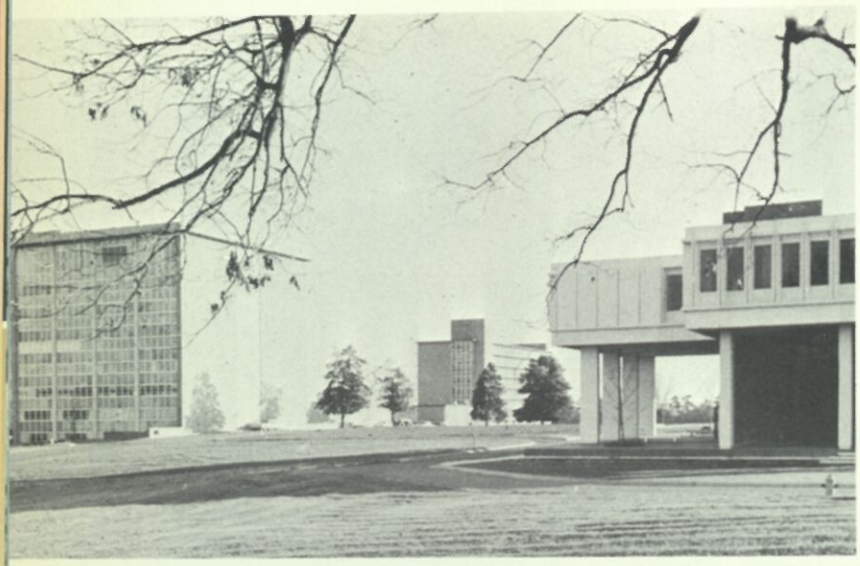
Small towns . . .

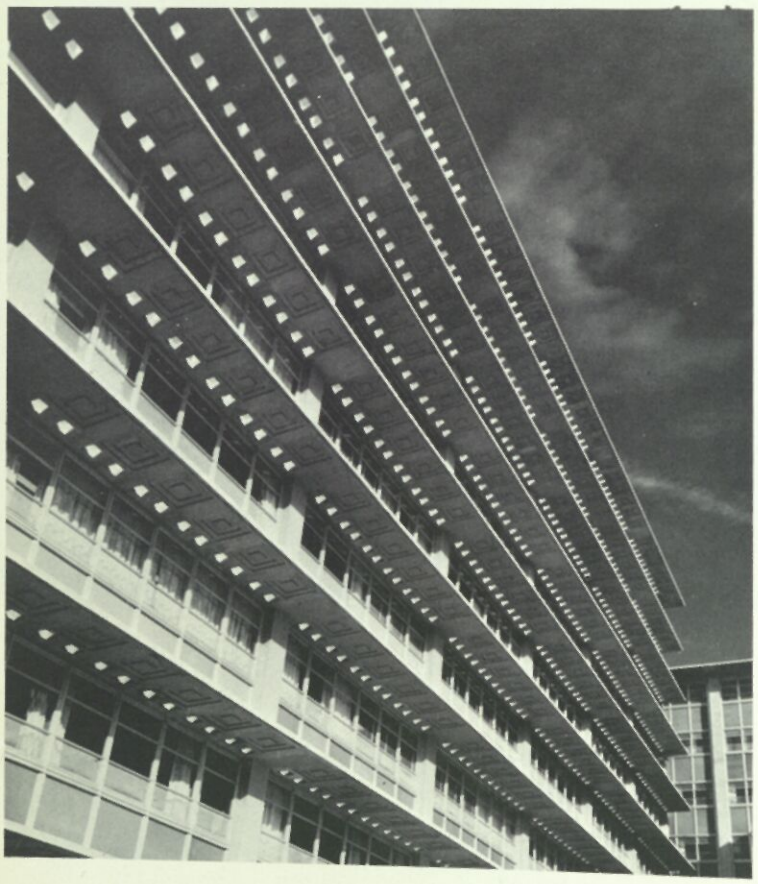
. . . cities . . .

. . . sending forth
sons and daughters

. . . in future time . . .
to heal . . .

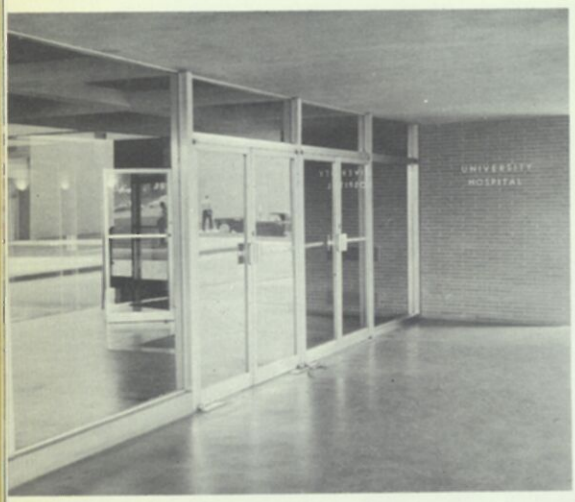
events
of the past . . .
dreams
to the future . . .
led us
to this place
and
we entered
as children . . .

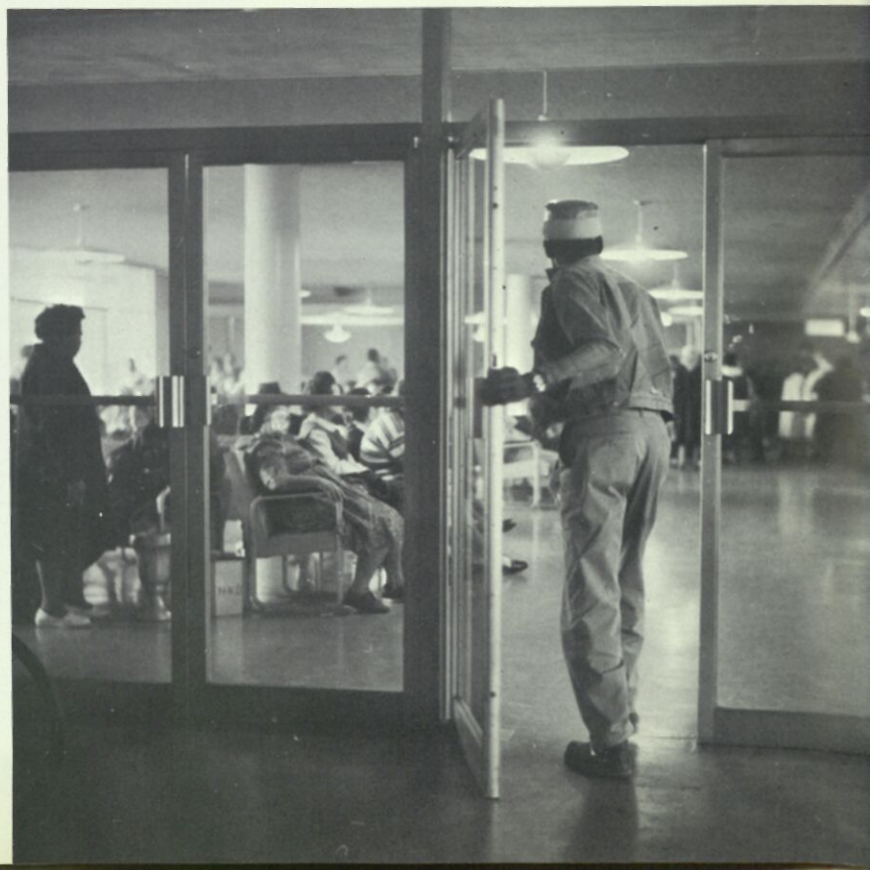




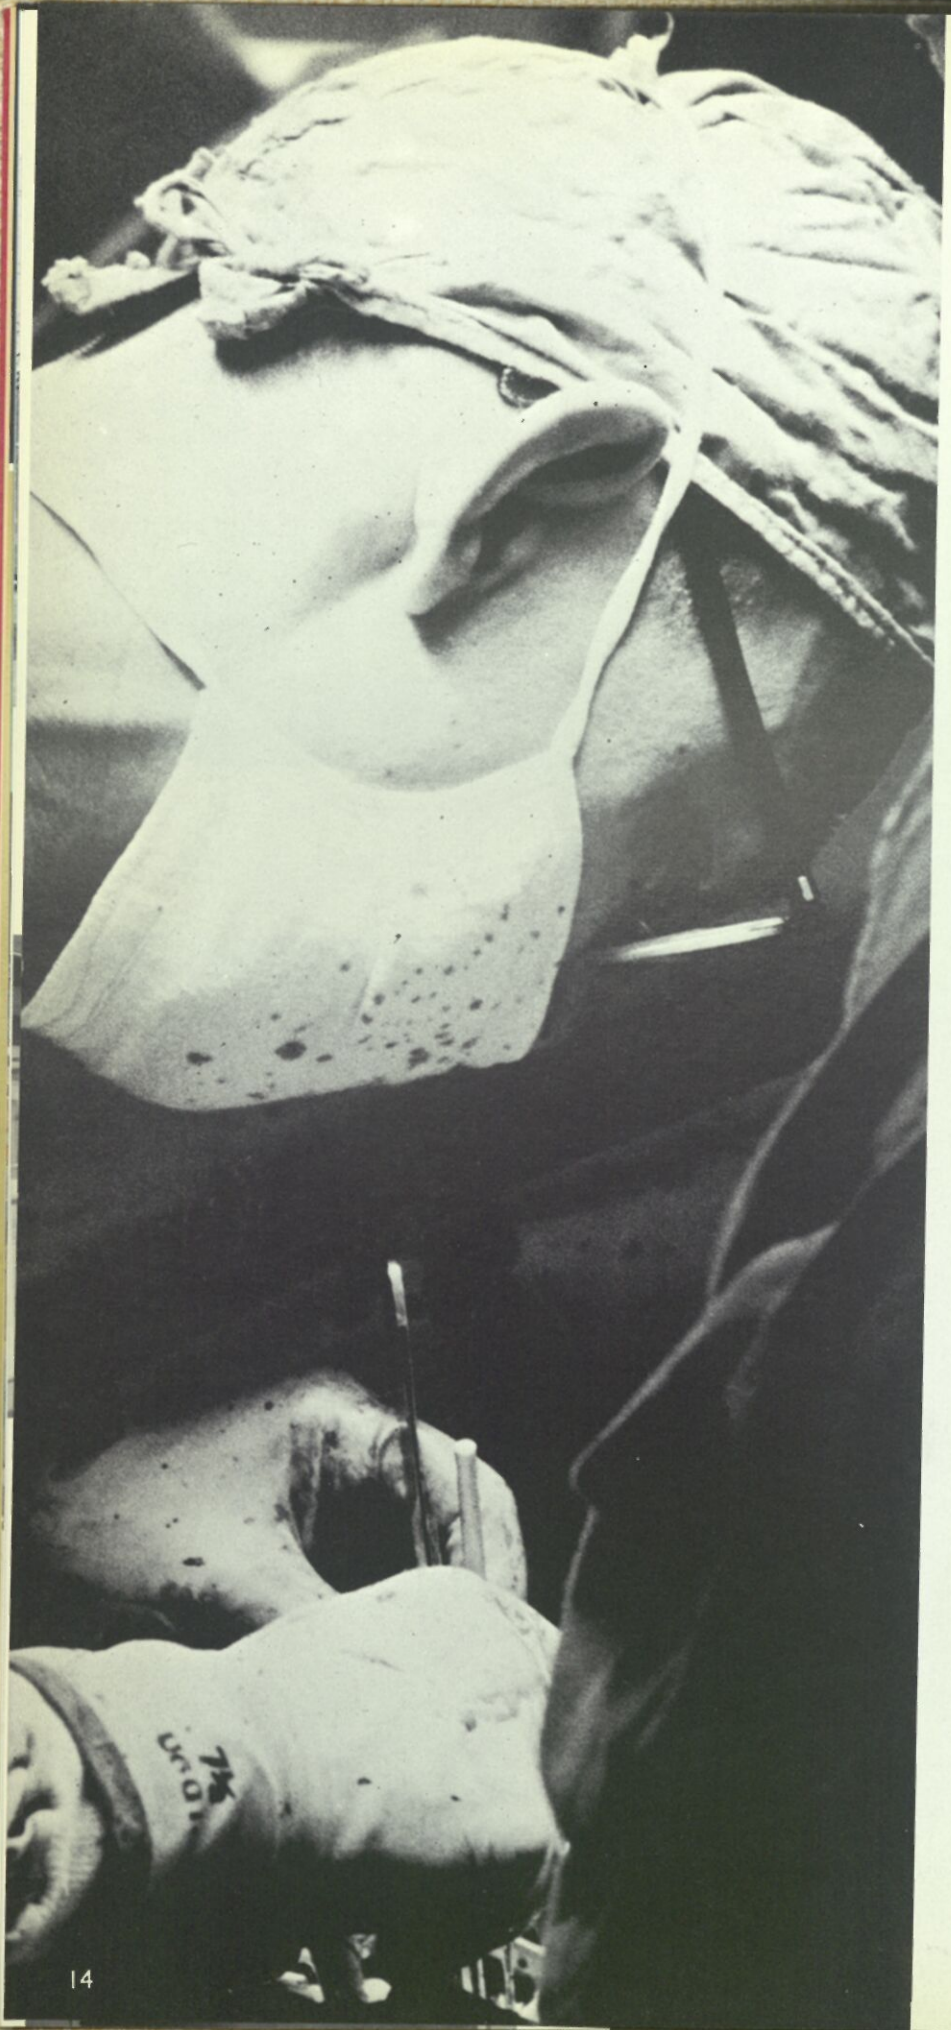
awed eyes
peering . . .
and at first we saw
only
coldness of these buildings

moving through doors
that sometime open . . .
sometime stay
ever closed . . .
. . . into . . .





unbelievable worlds of
antiseptic corridors
and
sheet white
austerity . . .



scrub suits and caps
green with life
in Spring . . .
but stained by
red agonies
of living.

THE WORLD'S GREATEST MEDICAL SCHOOL NEWSPAPER

VOL. 18 NO. 7 — UNIVERSITY OF ARKANSAS MEDICAL CENTER, LITTLE ROCK, ARK. — MARCH 1966

Dr. Holland Leaving UAMC

Dr. Robert C. Holland, Associate Professor of Anatomy at the Medical Center, will join the Rockefeller Foundation staff in Bankok, Thailand, July 1, to help develop a research and graduate program in neuroanatomy at the University of Medical Sciences. He expects to be in the Far East about six to eight years.

Dr. Holland will be working with Dr. James Dinning, former head of the Medical Center's Biochemistry Department, who went to Thiland about two and a half years ago.

The Rockefeller Foundation's Thai program involves establishment of a graduate program leading to the Ph. D. in basic medical sciences. A new building is under construction, financed by the Thai government, which will have multi-discipline laboratories for preclinical teaching. Equipment and consulting staff will be furnished by the Foundation and the first students will be accepted in the fall of 1967.

Through the long-range consultant program, Thai scientists will be trained to take over the teaching and research responsibilities. Presently, students seeking graduate training must attend universities in countries outside Thailand.

Dr. Jaques Named Head Pathologist

Dr. William E. Jaques will join the University of Arkansas Medical Center as chairman and head of the Department of Pathology July 1, Dean Winston K. Shorey of the School of Medicine announced.

De. Jaques is now serving a one-year visiting professorship at the National Defense Medical Center at Taipei, Taiwan, under the auspices of the China Medical Board. At the Arkansas Medical Center, he will succeed Dr. Tom D. Norman, who recently announced his resignation effective June 30.

Dr. Jaques formerly was professor and chairman of the Department of Pathology for eight years at the University of Oklahoma School of Medicine, was acting head of the Pathology Department at Louisiana State University and was a member of the faculty at Harvard Medical School from 1950 to 1953.

Dr. Jaques, a native of New ...bury, Mass., is a graduate of the University of New Hampshire and received his medical degree from McGill University at Montreal, Canada, in 1942. He served a one-year internship at Bridge-

...AMA To Poll Students On Federal Scholarships

By James Suen

Are you aware that the federal government is considering a bill ...t would provide a considerable incresae in the amount of federal ...nrefundable financial aid to medical students?

This proposal is important to the membership of the Student American Medical Association since SAMA is the official voice of the nation's medical students, and SAMA will be required to soon take a definite position on this issue.

Because all members of SAMA must have a voice in determining the position taken by their organization on the question of federal scholarships to medical students, Resolution No. 484 amended at the 1965 meeting of the House of Delegates required that SAMA poll its membership to determine how they stand. The results of this poll are to be sent by the Executive Council to the Congress and the President of the United States.

A questionaire will soon be distributed to University of Arkansas medical students and all SAMA members are asked to complete and return it to the appropriate, persons.

Some pros and cons of the proposal will be briefly discussed.

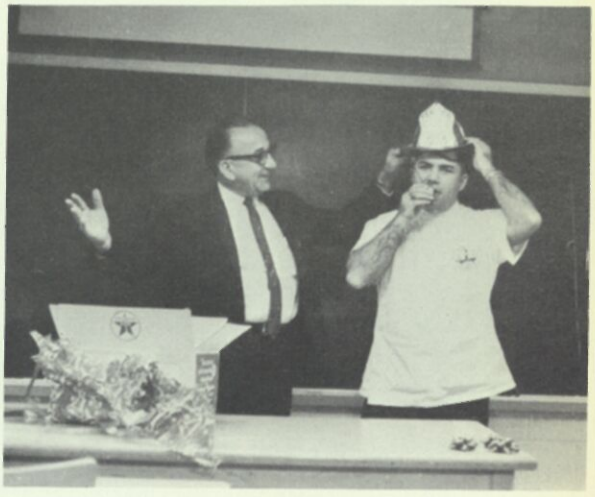
And he said, "Otto will take care of the laundry."

And quick as a flash, I said, "Otto will not."

"Do you know you are talking to the welter-weight champion of Schlossburg"

Did you know that women are smarter than men because they know less more and understand more?

I knew it all the time.

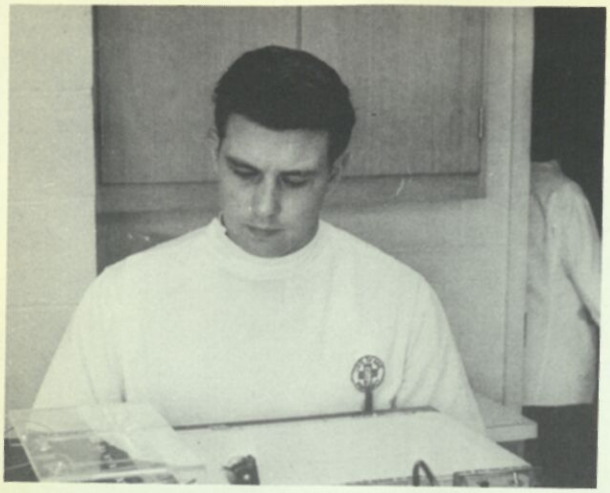


Hey, come on; it's my turn to be Smokey the Bear.

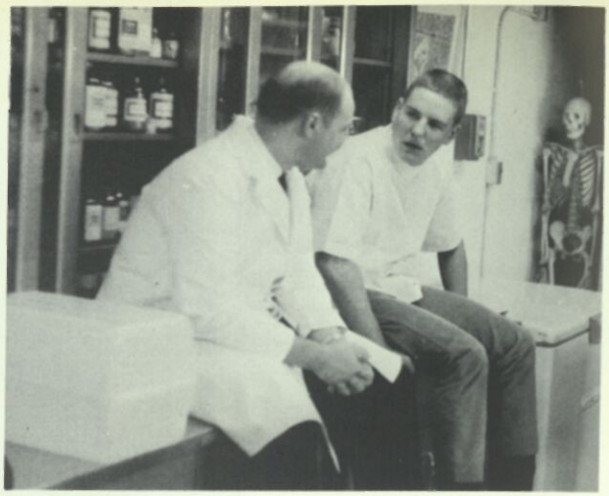
CAUSE: 19th showing of "V.D. and You."

"O-h-h, R-o-o-ger"

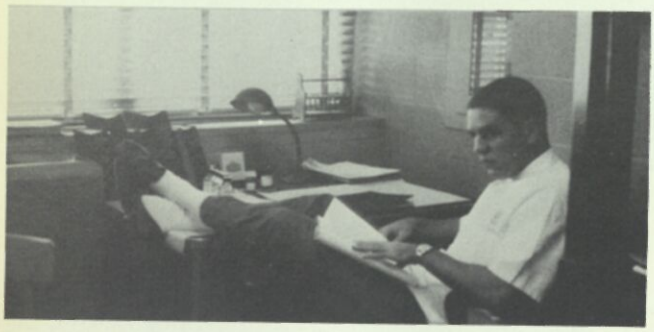
EFFECT: Makes my ears flap too.



And he said *all* these lines are important.

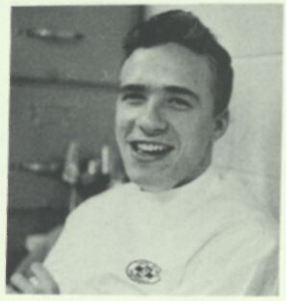


Like father—like son

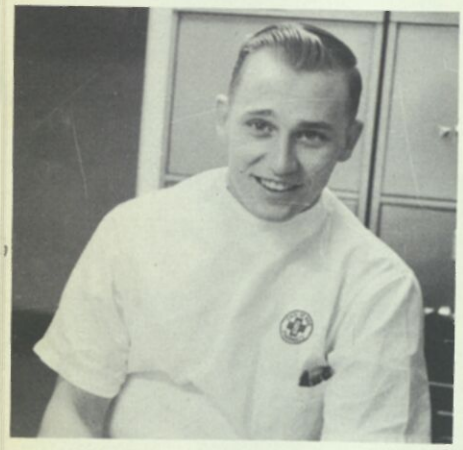


And then I said, "Look here Easterly ..."

... so I turned red, mumbled "pardon me," and ran out ...



"Man, this school is too easy."



"I've got this preceptor thing all figured out."

Blackmon working???

No, thank you! I'll get this label typed by myself.

If I stand here long enough, surely I'll find something wrong.

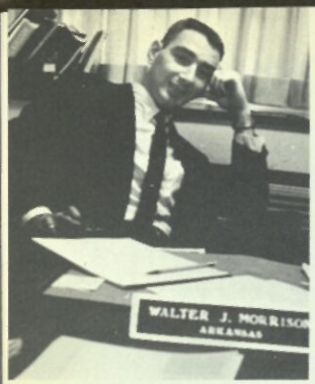
The Rho Chi Society had its origin in the merger of two movements, both commencing in 1917, to create a national honor society for pharmacy. The University of Arkansas received its charter in 1955; it is recognized as the Beta Iota Chapter of Rho Chi.

High standards of intellectual and scholarly attainments have been demanded for election to membership, and such election symbolized by the award of the Rho Chi Key.

New members are tapped in the spring and initiated at the annual banquet.



Sorry Boys, no goodies today.

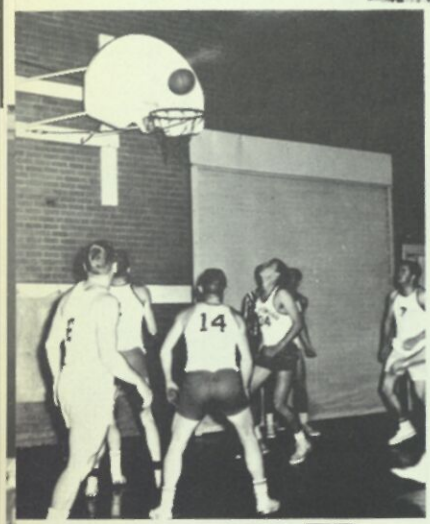
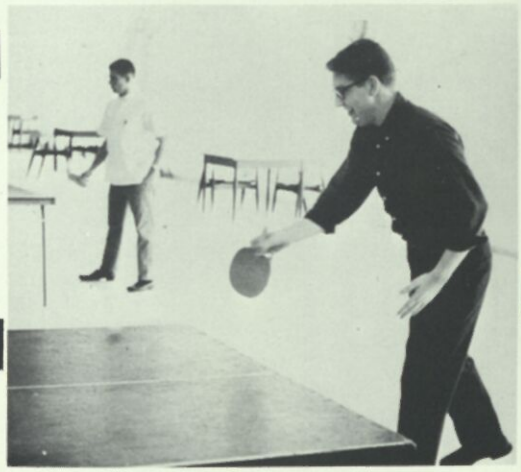
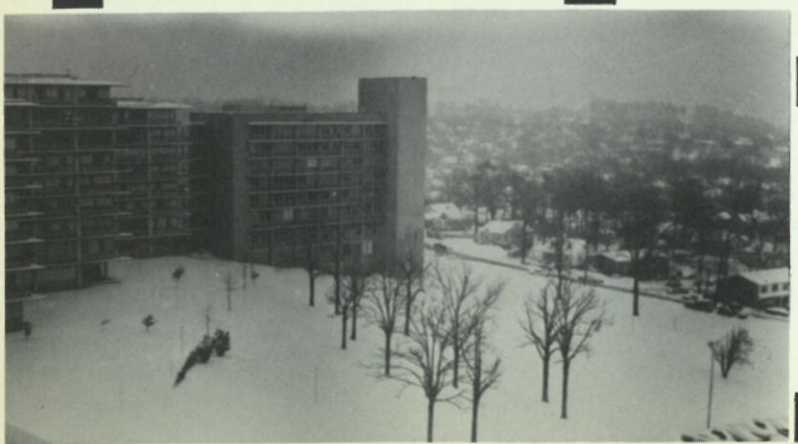
REMEMBER?







Memory is a fragile thing—
A bee's honey and its sting!
Newton

Tomorrow, the present will be only a memory. But what do you remember about today—passing jokes during a boring lecture, panic at the mere mention of posted grades, the shared excitement of ballgames and an occasional vacation, or the seemingly endless hours of study?

We have tried to record some of these situations and events. In the years to come, we hope you can look back through the yearbook and say, "Oh yes, I remember . . ."

At hospitals and medical outposts a long way from the classroom, medical students learn to cope with unfamiliar diseases; help to provide much-needed medical services to people in underdeveloped areas of the world; and contribute to international understanding and good will.

This unusual opportunity to work and study in foreign countries is offered to students through the Foreign Fellowships Program of Smith Kline & French Laboratories. Administered by the Association of American Medical Colleges, the program has enabled 123 students to work in 40 different countries during the past four years. Junior and senior medical students are eligible to apply for Fellowships, which provide for an average of 12 weeks' work abroad to be completed before internship.

Students who are interested in Fellowships should apply through the deans of their schools.
